

With widespread staff shortages and escalating hourly rates the Club decided to implement a new process for ordering food off the Pool Menu this year. This system will ensure consistent and efficient service to members under all conditions.

Steps for ordering food off the Pool Menu:

1. Member will place their order with the Server at the Cabana.
2. The Server will place the order into the P.O.S. and give the Member a pager
3. The food when ready in the Kitchen is brought down to the Tiki Bar and the pager# on the food ticket is depressed. The pager will then vibrate and/or flash and the member will know their food is ready for pickup.
4. The Member brings the pager with them to the Tiki Bar and places it in the return basket. The member takes their food and their needed amount of silverware rollups to their table.
5. The pager is placed back on the charging unit by the Server to be charged and re-distributed to another Member.
